Biodegradable palm leaf plates

Biodegradable palm leaf plates

Greenway palm leaf tableware is produced through a washing and hot pressing process of Bethel Palm Tree leaves, a plant originated in India and Malaysia.

Sturdy and refined, Greenway palm leaf tableware can be used for a short time span in traditional and microwave ovens and does not alter food taste. Ideal for serving natural products, it enhances the fresh, genuine taste of dishes.

Hot resistant up to 200° C / 392° F, it can be used in traditional or microwave ovens.

Cold-resistant down to 0° C / 32° F, it can be used in fridges and freezers.

Water-resistant, palm-leaf tableware can contain both hot and cold foods.
